StrategiX Security specializes in enterprise-scale security solutions for government agencies, government contractors/vendors, and large enterprises. We provide end-to-end cybersecurity services, including compliance certification readiness (e.g., NIST frameworks, CMMC 2.0, FedRAMP, StateRAMP, etc.), risk management, and cloud security deployments, ensuring regulatory alignment and operational resilience. StrategiX Security brings decades of experience securing mission-critical systems and advising government agencies on evolving cyber threats. With a commitment to innovation and compliance, StrategiX Security delivers tailored solutions that safeguard national security and enterprise infrastructure.

PAST EXPERIENCE

- DHS
- VA
- IRS
- Census Bureau
- Navy
- State of CA Healthcare Exchange
- State of OH Healthcare Exchange
- DIB-Verizon
- DIB-Comcast
- DIB-Charter/Spectrum

PROJECT SAMPLES

- End-to-End Cybersecurity Program
- End-to-End Security Architecture
- Healthcare Exchange Compliance Readiness
- Healthcare.gov Integration
- Security Operations Center Transformation
- Compliance Frameworks Readiness Projects (CMMC, FedRAMP, StateRAMP, and more)
- Transformation Architecture Roadmap
- Security Integration Design
- Fraud System Design
- Public Cloud Security Architecture

CORE COMPETENCIES

- **Risk & Compliance Readiness** – Tailored frameworks aligned with government & industry mandates.
- **Scalable Cybersecurity Solutions** – Flexible architectures that adapt to your organization's growth, securing cloud, hybrid, and on-premises environments.
- **Strategic Program Alignment** – Aligns cybersecurity initiatives with business objectives to enhance resilience, reduce risk, and support mission success.
- **Systems Architecture & Engineering** – Design and implement robust security architectures tailored to your unique operational needs, ensuring resilient and compliant infrastructures.
- **Cybersecurity Operations Oversight** – Provides operational cybersecurity leadership with a vetted partner.
- **Secure Application Development (Contracted)** – Provides oversight for custom application development with embedded security, delivered through trusted contractor support.

DIFFERENTIATORS

- **Deep Federal & DoD Cybersecurity Experience** – Over 12 years supporting DoD missions and 10+ years securing federal agencies against evolving cyber threats.
- **Enterprise-Level Cybersecurity Leadership** – Over 40 years of IT and cybersecurity expertise, including 20+ years at Tier 1 global consulting firms, delivering strategic solutions for federal agencies, DoD missions, and enterprise clients.
- **Cross-Sector Cybersecurity Expertise** – Bridging commercial innovation with government security mandates to deliver cutting-edge, compliant solutions that meet the rigorous demands of both sectors. This dual expertise ensures our clients benefit from cutting-edge technologies while maintaining strict compliance with regulatory requirements.
- **Proven Expertise in Compliance Readiness** – Helping agencies and enterprises prepare for CMMC 2.0, FedRAMP, StateRAMP, NIST, and other regulatory mandates.
- **Strategic Partnerships Providing Scalable Resources** – Access to U.S.-based, U.S. citizen security professionals through vetted partners, enabling seamless execution of large-scale projects.
- **FISMA "A+" Compliance for Multiple Federal Agencies** – Demonstrated success in achieving top-tier compliance ratings for federal organizations.
- **100% Veteran-Owned & Operated** – Bringing military precision, discipline, and mission-critical security expertise to every project.
